

6th International Dresden Symposium on Immunotherapy of Cancer

*dedicated to the 65th birthday of Peter Rieber
Head of the Institute of Immunology
Technical University of Dresden*

Vorsymposium zum
Dresdner Symposium
Hämatologie und
Onkologie 2006

Steigenberger Parkhotel
Dresden-Radebeul
22. September 2006
10:00 – 14:00 Uhr

Dear Colleagues:

The organizers cordially invite you to the 6th International Dresden Symposium on Immunotherapy of Cancer to be held on September 22, 2006, in Dresden.

The Dresden Symposia on Immunotherapy of Cancer are organized every other year and are intended as a stimulating forum to discuss in a pleasant atmosphere the latest experimental and clinical achievements in this rapidly evolving field. We are confident that the symposium will be of interest for both basic researchers and clinicians. The scientific program comprises plenary talks given by internationally respected specialists.

This year we are looking forward to share the meeting site with the 'Dresdner Hämatologie und Onkologie Tage', a symposium for clinical oncologists. This will allow to have an intensive exchange and create a supportive milieu for 'translational research' and future cooperative studies.

We would be delighted to welcome you to Dresden which in late summer presents itself as one of the most charming places in Germany.

Gerhard Ehninger

Marc Schmitz
